

# Proceedings of the International Conference Suzaku2006 Volume 2 (CD-ROM) Papers for poster presentations

[Preface](#)

[Program](#)

[Conference Photo1](#), [Photo2](#)

[Conference Poster](#)

Papers for Oral Presentations are published in [PTP Supplement No.169 \(2007\)](#)

[Front-Cover of PTP Supplement No.169](#), [Cover of PTP Supplement No.169](#)

Papers for Poster Presentations are included in this CD-ROM

\*) Titles and authors listed in this index are taken from the abstract book, not necessarily be the same as those written in the paper.

## 1. Gamma Ray Bursts, Cosmic Rays and Neutrino

- 1. The puzzling afterglow of GRB 050721  
L. A. Antonelli (INAF-OAR) et al.
- 2. [Swift XRT observations of X-ray Afterglows of Gamma-Ray Bursts](#)  
D. N. Burrows (Penn State) and the Swift XRT team
- 3. Time resolved spectroscopy in MeV domain: getting most from the low countrate data  
Anton Chernenko (Space Research Institute (IKI))
- 4. [Suzaku Joins the Third Interplanetary Network](#)  
K. Hurley (UC Berkeley), K. Yamaoka, M. Ohno, T. Takahashi, M. Tashiro, Y. Terada, T. Murakami, and K. Makishima
- 5. [Collisionless Shocks in Electron-Positron Plasmas and Particle Acceleration](#)  
Tsunehiko N. Kato (National Astronomical Observatory of Japan)
- 6. [Search for prompt optical radiation in coincidence with Gamma Ray Bursts using WIDGET](#)  
M. Kuwahara (RIKEN/TUS), T. Tamawaga(RIKEN), M. Tashiro(Saitama U), Y. Urata(Saitama U), K. Abe(Saitama U), K. Onda(Saitama U), F. Usui(ISAS/JAXA), and the WIDGET team
- 7. [A Possible Origin of Short-Term Variability in The Prompt Emission of Gamma-Ray Bursts](#)  
Youhei Masada (Department of Astronomy, Kyoto Univ.), Norita Kawanaka (Yukawa Institute for Theoretical Physics), Takayoshi Sano(Institute of Laser Engineering, Osaka Univ.) and Kazunari Shibata (Kwasan and Hida Observatory,

Kyoto Univ.)

- 8. Particle acceleration by the shock-current sheet interaction in relativistic collisionless pair plasma  
Kentaro Nagata and Masahiro Hoshino (The University of Tokyo)
- 9. [Two Components Model for SGR Short Bursts - Detailed Timing and Spectral Studies on HETE-2 Samples](#)  
Y. E. Nakagawa, A. Yoshida (Aoyama Gakuin University), K. Hurley (University of California at Berkley), T. Tamagawa, M. Suzuki (RIKEN), N. Kawai (Tokyo Institute of Technology), M. Matsuoka (JAXA) and HETE-2 Science Team
- 10. [Gamma-Ray Luminosity Function of Blazars and the Cosmic Gamma-Ray Background: Evidence for the Luminosity-Dependent Density Evolution](#)  
Takuro Narumoto, Tomonori Totani (Kyoto University)
- 11. [Supernova Rate Evolution: Constraints on the Delay Time of Type Ia Supernova and the Cosmic Star Formation History](#)  
Takeshi Oda (Kyoto), Tomonori Totani (Kyoto), Naoki Yasuda (Tokyo), Takahiro Sumi (Nagoya), Tomoki Morokuma (Tokyo), Mamoru Doi (Tokyo), and George Kosugi (NAOJ)
- 12. [Spectral properties of GRB prompt emissions with Suzaku Wideband All-sky](#)  
Masanori Ohno (Hiroshima Univ.), Yasushi Fukazawa(Hiroshima Univ.), Kazutaka Yamaoka(Aoyama Gakuin Univ.), Yukikatsu Terada(RIKEN), Tadayuki Takahashi (ISAS/JAXA), Kazuo Makishima(Univ. of Tokyo/RIKEN), Makoto Tashiro (Saitama Univ.), Toshio Murakami(Kanazawa Univ.)
- 13. [Shock acceleration of electrons: GEOTAIL observation](#)  
M. Oka (Kyoto University), T. Terasawa, N. Shimada, H. Kojima, Y. Kasaba, M. Fujimoto, H. Matsumoto, T. Mukai
- 14. [Cross-Field Diffusion of Cosmic Rays in Two-Dimensional Magnetic Field Turbulence Models](#)  
Fumiko Otsuka (Kyoto University) and Tohru Hada
- 15. Dark Gamma-Ray Bursts  
A. Pozanenko (Space Research Institute), A. Kann (Thueringer Landessternwarte Tautenburg), V. Rumyantsev (Crimean Astrophysical Observatory), D. Sharapov (Maidanak Astronomical Observatory and Nordic Optical Telescope, La Palma)
- 16. Swift/BAT extended high energy spectroscopy for Gamma-ray Bursts  
G. Sato (GSFC/ISAS), K. Onda (Saitama U.), T. Sakamoto (GSFC/ORAU), M. Tashiro (Saitama U.), T. Takahashi (ISAS), A. Parsons (GSFC), S. Barthelmy (GSFC), N. Gehrels (GSFC)
- 17. [Suzaku WAM observation of the highest redshift GRB 050904](#)  
S.Sugita (Aoyama Gakuin University), K.Yamaoka, M.Ohno, Y.Terada, M.Tashiro, T.Takahashi, K.Makishima and Suzaku WAM team
- 18. Very high-energy astrophysics and cosmology of extreme energies and densities in universe  
Yoshiyuki Takahashi (The University of Alabama in Huntsville)
- 19. [Particle Acceleration by Relativistic Expansion of Magnetic Arcades](#)  
Hiroyuki Takahashi, E. Asano, R. Matsumoto (Chiba University)
- 20. [Recent results from the Tibet air shower experiment and towards 100 TeV gamma-ray astronomy](#)  
Masato Takita (the University of Tokyo ) for the Tibet ASgamma Collaboration

- 21. Relativistic Statistical Thermodynamics of Dense Photon Gas  
Levan N.Tsintsadze (Andronikashvili Institute of Physics), Dirk K.Callebaut, Nodar L.Tsintsadze
- 22. THE ENERGETICS OF GAMMA RAY BURSTS INDUCED BY MINI CREATION EVENTS  
MURLI MANOHAR VERMA (LUCKNOW UNIVERSITY)
- 23. Combination studies of X-ray and optical GRB afterglow light curve  
Y. Urata (Saitama U), K-Y. Huang (NCU), W-H. Ip (NCU), Y. Qiu (NAOC), J. Wei (NAOC), J.S. Deng (NAOC), T. Tashiro (Saitama U), T. Tamagawa (RIKEN), and the EAFON team
- 24. Spectrum-Brightness Relationship of Multi-Spiked GRBs Observed by HETE-2  
Atsumasa Yoshida, Yujin E. Nakagawa, Satoshi Sugita, Ichiro Takahashi, Nobuyuki Ishikawa (Aoyama Gakuin University), Roland Vanderspek (MIT) and HETE-2 team

## 2. Thermal Structure/Dynamics of Groups and Clusters of Galaxies

- 25. [Effects of Radiative Cooling on Core Sizes and Gas-Mass Fraction in Galaxy Clusters](#)  
Takuya Akahori (Tokyo Metropolitan University) Naomi Ota (Riken) Kuniaki Masai (Tokyo Metropolitan University)
- 26. Discovery of a Giant Ring-like Structure of Radio Emission Around Galaxy Cluster Abell 3376  
Joydeep Bagchi (The Inter-University Centre for Astronomy and Astrophysics), Florence Durret (Institut d'Astrophysique de Paris), Gastao B. Lima Neto (Instituto Astronomico e Geo sico), Surajit Paul, (Institut fur Theoretische Physik und Astrophysik)
- 27. [X-ray observation of the merging cluster CL J005603-3732.7](#)  
S. Carpano (European Space Astronomy Centre), M. Schirmer (Isaac Newton Group of Telescopes), M. Ehle (ESAC), J. Wilms (Astronomisches Institut der FAU Erlangen-Nuernberg)
- 28. Cooling Flow and Thermal Conduction in Clusters of Galaxies  
Nelson Falcon (Universidad de Carabobo. FACYT Physics Dpto)
- 29. [X-ray observations of Ophiuchus Cluster of Galaxies](#)  
M. Fiacchi (INAF), P. Ubertini, A. Bazzano, L. Bassani, R. Landi
- 30. [Does a Galaxy Fly?](#)  
Yutaka Fujita (Osaka University)
- 31. [Properties of Galaxy Groups in the Fields of Lensed Quasars](#)  
C.E. Grant, M.W. Bautz (MIT)
- 32. [Systematic investigation of X-ray morphology of 101 clusters of galaxies using objective measures](#)  
Yasuhiro Hashimoto (SAAO), Hans Boehringer (MPE), J. Patrick Henry (U of Hawaii), G. Hasinger (MPE), G. Szokoly (MPE)
- 33. [Search for the Bulk Motion of Hot Gas in Cluster of Galaxies](#)  
Kazuto Hasuike, Kiyoshi Hayashida (Osaka University) and the Suzaku team
- 34. [High Density of X-ray sources in the Clusters of Galaxies](#)  
Murat Hudaverdi, Yuzuru Tawara, Hideyo Kunieda, E (Nagoya University), Nihal Ercan
- 35. Hard X-rays and Gamma-rays from Ultra-High Energy Processes in Clusters of

## Galaxies

Susumu Inoue (National Astronomical Observatory of Japan), Felix Aharonian, Paolo Coppi, Naoshi Sugiyama

- 36. [Hard X-ray Observation of Abell 3376 with Suzaku](#)  
N. Kawano(Hiroshima University), K.Nakazawa(ISAS/JAXA), Y.Fukazawa (Hiroshima University), and Abell 3376 analysis team
- 37. A Study of the Sculptor Supercluster using Suzaku  
R.L. Kelley (NASA/Goddard) for the Suzaku Sculptor Supercluster Team
- 38. [Suzaku study of hard X-ray emission from relaxed galaxy clusters](#)  
T. Kitaguchi (Univ. of Tokyo), K. Makishima (Univ. of Tokyo/RIKEN), K. Nakazawa (ISAS/JAXA), Y. Fukazawa (Hiroshima Univ.), N. Kawano (Hiroshima Univ.), N. Yamasaki (ISAS/JAXA), A. Furuzawa (Nagoya Univ.), and N. Ota (RIKEN)
- 39. Constraining ICM parameters from pressure  
Patrick Koch (Academia Sinica, Institute of Astronomy and Astrophysics)
- 40. [A NEW TEMPERATURE MASS RELATION FOR GALAXY CLUSTERS](#)  
Lee, Tse-Lin (Institute of Astronomy, National Central University) Hwang, Chong-Yuan (Institute of Astronomy, National Central University)
- 41. Is the X-ray emission from clusters predominantly thermal?  
Richard Lieu (University of Alabama, Huntsville), Max Bonamente (University of Alabama, Huntsville), Jonathan Mittaz (University of Maryland, College Park)
- 42. X-ray Properties of a Mass-Selected Group Catalog  
P. Mazzotta(1,2), R. Bower(3), M. Balogh(4), T. Ponman(5), T. Theuns(3), A. Edge(3), V. Eke(3), H. Bohringer(6)  
(1) Dep. of Physics University of Rome "Tor Vergata", Italy, (2) Harvard-Smithsonian Center for Astrophysics, USA, (3) Department of Physics, University of Durham, UK (4) University of Waterloo, Canada, (5) University of Birmingham, UK, (6) Max-Planck-Institut fur Extraterrestrische Physik, Garching, Germany
- 43. [Embryology of Elliptical Galaxies](#)  
Masao Mori (Senshu University), Masayuki Umemura (Tsukuba University)
- 44. [The gravitational potential and X-ray luminosities of elliptical galaxies observed with XMM-Newton](#)  
Ryo Nagino, Kyoko Matsushita (Tokyo University of Science)
- 45. [Galaxy Cluster Scaling Relations: Evolution and Scatter](#)  
Tim O'Hara, Joe Mohr (Illinois)
- 46. The XI Project: The first unbiased X-ray view of galaxy groups and their galaxies  
Jesper Rasmussen (Univ. of Birmingham), John Mulchaey (Carnegie Obs.), Trevor Ponman, Somak Raychaudhury (Univ. of Birmingham, UK)
- 47. [Tidal disruption of dark mini-halos in the Milky Way](#)  
Ryo Shiota, Tomonori Totani (Kyoto University)
- 48. [X-Ray and Mass Distribution in the Merging Galaxy Cluster 1E 0657-56](#)  
Motokazu Takizawa (Yamagata University)
- 49. Suzaku observation of the Abell 2052 cluster of galaxies  
T.Tamura (JAXA) and the Suzaku SWG A2052 team
- 50. Non-uniform Temperature Distribution in the Galaxy Clusters 2A 0335+096

and Abell 496 Observed by XMM-Newton

Takeshi Tanaka, Hideyo Kunieda, Murat Hudaverdi, Akihiro Furuzawa, Yuzuru Tawara (Nagoya University)

- 51. [Suzaku observation of HCG62: temperature, abundance, and the extended hard X-ray emission profiles](#)  
K. Tokoi, K. Sato, Y. Ishisaki, T. Ohashi(Tokyo Metropolitan U.), N. Y. Yamasaki, K. Nakazawa(ISAS/JAXA), K. Matsushita(Tokyo U. of Science), Y. Fukazawa (Hiroshima U.)
- 52. A Chandra Study of the Energy Feedback in Nine Galaxies Clusters  
Liyi Gu (Shanghai JiaoTong University), Haiguang Xu, Junhua Gu, Zhongli Zhang, Yu Wang, Xiangping Wu
- 53. [Calibrating scaling relations using 2 large samples of galaxy clusters @z 0.2,0.3: XMM-Newton observations](#)  
Y.-Y. Zhang (MPE), A. Finoguenov, H. Boehringer, J.-P. Kneib, G. P. Smith, O. Czoske, G. Soucail, and P. Schuecker

### 3. Chemical Structure and Evolution Clusters of Galaxy

- 54. Suzaku observations of NGC 4636  
K. Arnaud (NASA Goddard Space Flight Center), Y. Fukazawa, K. Makishima, K. Matsushita, E. Miller, T. Tamura, M. Tozaku, M. Sato
- 55. [Suzaku Study on Spatial Oxygen Distribution in the Centaurus Cluster](#)  
Madoka Kawaharada (University of Tokyo), Kazuo Makishima, Noriko Yamasaki, Kyoko Matsushita, Naomi Ota, Takaya Ohashi, Yasushi Fukazawa, Kosuke Sato
- 56. [Interpreting X-ray Abundance in Elliptical Galaxies](#)  
Michael Loewenstein (NASA/Goddard Space Flight Center) David S. Davis
- 57. Suzaku observation of the interstellar medium in the Small Magellenic Cloud  
Caroline A. Kilbourne (NASA Goddard Space Flight Center) for the Suzaku SMC-diffuse team
- 58. Abundance Pattern in the intracluster medium  
Chiaki Kobayashi (National Astronomical Observatory of Japan)
- 59. [Suzaku observation of the metallicity in the hot interstellar medium of the isolated elliptical galaxy NGC720](#)  
Chiho Matsumoto, Yuzuru Tawara (Nagoya University), Miyako Tozuka, Yasushi Fukazawa (Hiroshima University), Kyoko Matsushita (Tokyo University of Science), Naohisa Anabuki (Osaka University), & Hironori Matsumoto (Kyoto University)
- 60. [Suzaku and XMM-Newton observations of Largely Extended X-ray Nebula Around the Seyfert2 Galaxy NGC4388](#)  
M.Ozawa (Kyoto), T.G.Tsuru (Kyoto), D.Yonetoku (Kanazawa), S.Yokota (Kanazawa), Y.Hyodo (Kyoto), K.Iwasawa (MPE), Y.Fukazawa (Hiroshima), and the Suzaku NGC4388 team
- 61. [XMM-Newton and Suzaku observations of the M82 centre: Chemical abundances of the hot gas](#)  
P. Ranalli (RIKEN), A. Comastri, R. Maiolino, L. Origlia, M. Ozawa, T. Tsuru, and the M82 Suzaku Working group
- 62. [Temperature and abundance profiles of the cluster of galaxies A1060](#)  
K. Sato(TMU), N. Y. Yamasaki(ISAS/JAXA), Y. Ishisaki(TMU), M. Ishida(TMU) and

T. Ohashi(TMU)

- 63. [How the fast stellar wind blowing - A lesson from the recent X-ray observations of planetary nebulae](#)  
T.Suda (Tokyo), M.Y.Fujimoto (Hokkaido), M.Murashima (Tokyo), M.Kokubun (Tokyo), K.Makishima (Tokyo)
- 64. [Suzaku observation of X-ray faint elliptical galaxy NGC 3923](#)  
Miyako Tozuka, Chihiro Egawa, Yasushi Fukazawa (Hiroshima Univ.)
- 65. Metals in the cores of nearby clusters of galaxies  
N. Werner (SRON), J. de Plaa, J. A. M. Bleeker (SRON, Utrecht; Utrecht University), J. S. Kaastra, M. Mendez (SRON), J. Vink (Utrecht University)
- 66. Revised Model for the Absorption of X-Rays in the Interstellar Medium  
J. Wilms (University of Erlangen-Nuremberg), A. Juett (University of Virginia), M.A. Nowak, N.S. Schulz (MIT)

#### 4. Warm and Hot intraGalactic Medium

- 67. Measurements of the X-ray spectrum of SNR N103B using the Suzaku X-ray Imaging Spectrometer  
G. V. Brown (Lawrence Livermore National Laboratory), J. P. Hughes (Rutgers University), F. S. Porter (NASA/GSFC)
- 68. [Detailed analysis of the Suzaku data of comet 73P/SW3](#)  
Yuichiro Ezoe for the Suzaku 73P/SW3 team
- 69. Modeling the Radial Plasma Structure of SNR E0102.2-7129  
K.A. Flanagan, J.C. Houck, C.R Canizares (MIT)
- 70. Line-of-sight spatial extent of warm-hot medium in the direction of LMC X-3  
Toshishige Hagihara, Kazuhisa Mitsuda, Noriko.Y.Yamasaki, Yoh Takei(ISAS/JAXA), Dan McCammon(U.Wisconsin), Daniel Wang, Yangsen Yao (U.Massachusetts)
- 71. [A Suzaku observation of the Local Bubble and Galactic Halo](#)  
D. B. Henley, R. L. Shelton (University of Georgia), K. D. Kuntz (NASA/GSFC)
- 72. [The radial structure of the Cygnus Loop from north-east to southwest obtained with the Suzaku observatory](#)  
S. Katsuda (Osaka University) et al.
- 73. [Suzaku observations of Cas A](#)  
Yoshitomo Maeda (ISAS/JAXA) and the Suzaku Cas A team
- 74. [Probing the Explosion Mechanism of Supernovae by Radioactive Decay Gamma- and X-Rays](#)  
Keiichi Maeda (University of Tokyo)
- 75. [Suzaku Observations of the Diffuse X-ray Background at High Galactic Latitudes](#)  
Dan McCammon (Univ. of Wisconsin), Michael Bauer (ISAS, MPE), Ryuichi Fujimoto (ISAS), Yoshitaka Ishisaki (Tokyo Metropolitan Univ.), Kazuhisa Mitsuda (ISAS), Lindsay Rocks (Univ. of Wisconsin), Randall Smith (GSFC), Daniel Wang (Univ. of Massachusetts), Noriko Yamasaki (ISAS)
- 76. [Hydrodynamic model of the shock-cloud interaction in the Vela SNR](#)  
M. Miceli (Universita' di Palermo - INAF Osservatorio Astronomico di Palermo), F. Reale, S. Orlando, F. Bocchino
- 77. [The North Polar Spur: Detection of Highly-Ionized Nitrogen Emission with Suzaku](#)

Eric Miller (MIT), Hiroshi Tsunemi (Osaka University), Mark Bautz (MIT), the Suzaku Team

- 78. ["Equivalent" Views of the Cygnus Loop](#)  
Norbert Nemes, Hiroshi Tsunemi, Emi Miyata, Satoru Katsuda (Osaka University)
- 79. [Internal states of young type Ia supernova remnants and its suitable model](#)  
Hitoshi Ozaki, Toshikazu Shigeyama (University of Tokyo)
- 80. [Suzaku XIS Observations of the SNR 1E0102.2-7219 Region](#)  
Dai Takei, Masahiro Tsujimoto, Shunji Kitamoto (Rikkyo Univ.), Eric Miller (MIT), et al.
- 81. [Spatially resolved spectral analysis of the northeastern limb of the Cygnus Loop with the Suzaku observatory](#)  
Uchida, H. (Osaka University) et al.
- 82. [Constraints on the physical states of Hot Interstellar Medium towards the galactic bulge](#)  
Tomotaka Yoshino, Kazuhisa Mitsuda, Noriko. Y. Yamasaki, Ryuichi Fujimoto, Yoh Takei (ISAS/JAXA), Dan McCammon (University of Wisconsin)

## 5. The Galactic Center and Ridge Emissions

- 83. [High energy view of the sky with SPI/INTEGRAL: galactic source population and component vs. diffuse component](#)  
L. Bouchet (CESR/ Universite Paul Sabatier Toulouse), J.Proques on behalf of SPI/INTEGRAL team
- 84. [Annihilation Emission from the Galactic Black Hole](#)  
V.A.Dogiel (P.N.Lebedev Institute), K.S.Cheng (The University of Hong Kong), D.O Chernyshov (Moscow Institute of Physics and Technology)
- 85. [Discoveries of Diffuse Iron Line Sources and Flux Variability from the Sgr B Region](#)  
Tatsuya Inui, Katsuji Koyama, Yoshiaki Hyodo, Hironori Matsumoto, Takeshi Go Tsuru (Kyoto University) Yoshitomo Maeda, Hiroshi Murakami (ISAS/JAXA) Shigeo Yamauchi (Iwate University)
- 86. [6.4 keV line emission and molecular clouds in the Galactic center region](#)  
Hiroshi Murakami (ISAS/JAXA), Yojiro Takikawa, Masayoshi Nobukawa, Tatsuya Inui, Hiroshi Nakajima, Katsuji Koyama (The University of Kyoto), Yohko Tsuboi, and Miura Jun'ichiro (Chuo University)
- 87. [Suzaku observation of Sgr C molecular cloud region](#)  
H. Nakajima, T.Inui, Y.Hyodo, Y.Takikawa, M.Nobukawa, K.Koyama (Kyoto University), H.Murakami (ISAS/JAXA), and A.Senda (RIKEN)
- 88. [An X-ray observation of Sgr B1 with Suzaku](#)  
Masayoshi Nobukawa, Hiroshi Nakajima, Tatsuya Inui, Yoshiaki Hyodo, Yojiro Takikawa, Katsuji Koyama (Kyoto University), Hiroshi Murakami (ISAS/JAXA) and the Suzaku GC team
- 89. Origin Of The Galactic Ridge X-ray Emission  
M.Revnivtsev (MPA), S.Sazonov, E.Churazov, M.Gilfanov, R.Krivosos, R.Sunyaev
- 90. [XMM-Newton view of the iron line in the Galactic Centre Region](#)  
Masaaki Sakano, Robert S. Warwick (Univ. Leicester), Anne Decourchelle (Saclay)
- 91. Search for thermal and nonthermal supernova remnants near the Galactic Center

Atsushi Senda (RIKEN), Hiroshi Murakami (ISAS/JAXA), and Katsuji Koyama (Kyoto Univ.)

- 92. [Suzaku observations of the 6.4 keV emission in the Galactic center region](#)  
Yojiro Takikawa, Masayoshi Nobukawa, Hironori Matsumoto, Takeshi Go Tsuru, Katsuji Koyama (Kyoto University), Hiroshi Murakami (ISAS/JAXA), Atsushi Senda (RIKEN), Suzaku GC team
- 93. [Analysis of hard X-ray spectra from Sgr B2 region](#)  
K. Tamura, H. Murakami, K. Nakazawa, T. Takahashi, T. Tanaka, S. Watanabe (ISAS/JAXA), M. Kokubun (Tokyo Uni.), K. Koyama (Kyoto Uni.)
- 94. Complex local X-ray spectral structures in the Galactic center region  
Y. Tanaka, K. Iwasawa (Max-Planck-Institut fuer Extraterrestrische Physik), L. Gallo
- 95. [Plasma diagnostics for Sgr A\\* and Galactic Center Diffuse Emission](#)  
Noriaki Tawa, Hiroshi Tsunemi (Osaka University)
- 96. [Suzaku Observation of Sgr A East](#)  
Hideki Uchiyama, Katsuji Koyama, Yoshiaki Hyodo, Hironori Matsumoto, Takeshi Go Tsuru (Kyoto University) Masanobu Ozaki, Yoshitomo Maeda, Hiroshi Murakami (ISAS/JAXA)
- 97. [Suzaku Observations of the Galactic Plane](#)  
S. Yamauchi, (Iwate University), K. Ebisawa (ISAS/JAXA), K. Koyama (Kyoto), Y. Tanaka (MPE), and Suzaku team
- 98. [HXD-PIN Studies of the Diffuse Hard X-ray Emission from the Galactic Center Region](#)  
Takayuki Yuasa, Motohide Kokubun (The University of Tokyo), Kazuo Makishima (The University of Tokyo, RIKEN), Ken-ichi Tamura, Hiroshi Murakami (ISAS/JAXA), Atsushi Senda (RIKEN), Katsuji Koyama (Kyoto University) and the Suzaku GC Team

## 6. SN 1006 Milenium Special Session

- 99. [Looking for accelerated protons in SN 1006 : the gas density in the remnant](#)  
F. Acero (CEA/Saclay), J. Ballet, A. Decourchelle CEA/Saclay Service d'Astrophysique
- 100. Evidence of a Curved Cosmic-Ray Electron Spectrum in the Supernova Remnant SN 1006  
G. E. Allen (MIT), J. C. Houck (MIT) and S. J. Sturmer (USRA-NASA/GSFC)
- 101. [The hard X-ray emission from the plerionic supernova remnant G21.5- 0.9](#)  
F. Bocchino (INAF-OAPa, Italy), L. Sidoli, A. Pizis, S. Mereghetti (INAF- IASF, Italy)
- 102. Nonthermal Property of Northeastern Rim in Vela Jr. SNR with XMM-Newton  
J.S.Hiraga (RIKEN), T.Kishishita, A.Bamba and T.Takahashi
- 103. Search for Titanium 44 Decay Line from Vela Jr.  
Toru Tamagawa, Aya Bamba, Junko Hiraga (RIKEN), Una Hwang (GSFC/NASA), Hideaki Katagiri (Hiroshima Univ.), Motohide Kokubun (Univ. Tokyo), Katsuji Koyama (Kyoto Univ.), Rob Petre (GSFC/NASA) et al.
- 104. [Study of non-thermal emission from SNRs with the HXD onboard Suzaku](#)  
Takaaki Tanaka (ISAS/JAXA), Tadayuki Takahashi, Shin Watanabe, Yasunobu Uchiyama, Junko Hiraga, Aya Bamba, Robert Petre, John Hughes et al.
- 105. [Discovery of a Featureless X-Ray Spectrum in the Supernova Remnant Shell](#)

## [of G330.2+1.0](#)

K. Torii (Osaka), H. Uchida (Osaka), K. Hasuike (Osaka), H. Tsunemi (Osaka), Y. Yamaguchi (Yamagata), S. Shibata (Yamagata), and K. Mori (Miyazaki)

- 106. [Suzaku observation of SN 1006: the study of acceleration efficiency on the non-thermal rims of SNR](#)  
Hiroya Yamaguchi (Kyoto Univ.), Aya Bamba (RIKEN), Junko S. Hiraga (RIKEN), and Katsuji Koyama (Kyoto Univ.)
- 107. An X-ray spectral study of ne structures of the Crab Nebula  
M. Yamamoto, K. Mori (Miyazaki), D. N. Burrows, G. G. Pavlov (Penn State), J. J. Hester (Arizona), S. Shibata (Yamagata), H. Tsunemi (Osaka)

## 7. Stars and Clusters

- 108. [X-ray emission in protostellar jets: model predictions and comparison with observations](#)  
R. Bonito, S. Orlando, G. Peres (INAF { Osservatorio Astronomico di Palermo), F. Favata (ESTEC), R. Rosner (Univ. of Chicago)
  - 109. [Radio Imaging of the X-ray Emitting Protostars in the R Coronae Australis IRS 7 Region](#)  
Minho Choi (Korea Astronomy and Space Science Institute), Kenji Hamaguchi (NASA/GSFC), Ken'ichi Tatematsu (NAOJ), Chul-Sung Choi (Korea Astronomy and Space Science Institute)
  - 110. [Suzaku observation of the diffuse emission in M17](#)  
Y. Hyodo, K. Koyama (Kyoto Univ.), M. Tsujimoto, A. Sekiguchi, S. Kitamoto (Rikkyo Univ.), and K. Hamaguchi (GSFC)
  - 111. A simulation on protostar and the expected hard X-ray spectrum  
T. Kawamichi, K. Shibata (Kyoto University)
  - 112. Structures Outside and Inside the Sun (Observations, Formation, Carrying Out and Development of Structures Images of a Filamentary Dark Matter)  
V. A. Rantsev-Kartinov (Institute for Nuclear Fusion Russian Research Center "Kurchatov Institute")
  - 113. [A bright impulsive X-ray from the dMe star V988 Ori in front of L1641 in Orion A](#)  
Hideki Ozawa (Osaka University), Nicolas Grosso, Thierry Montmerle
  - 114. [Spectral analysis of eta Carinae with Suzaku](#)  
A. Sekiguchi, S. Kitamoto, M. Tsujimoto (Rikkyo University), K. Hamaguchi, Y.-H. Chu, Suzaku Eta Car Team
  - 115. Geometry diagnostics from Fe emission in the evolved G1 giant HR 9024  
Paola Testa, David Huenemoerder (MIT), Jeremy Drake (SAO), David Garcia-Alvarez (Imperial College, London, UK)
  - 116. X-Ray Emission Line Profiles of Early-Type Stars Observed with Chandra and XMM-Newton  
Norimasa Yamamoto (Nagoya University), Takayoshi Kohmura (Kogakuin University), and Shunji Kitamoto (Rikkyo University)
- ## 8. White Dwarf & Neutron Star Isolated and/or Binaries
- 117. Broadband X-ray Spectroscopy of the ADC Source 4U 1822-37 with Suzaku  
J. Cottam & N. White (NASA/GSFC)

- 118. X-ray Emission Properties of the Magnetic Cataclysmic Variable BG CMI  
Chul-Sung Choi (KASI) Tadayasu Dotani (ISAS/JAXA)
- 119. Broad band observations of warm absorbers in dipping low mass X-ray binaries  
M. Diaz Trigo (XMM-Newton Science Operations Centre, ESAC, ESA), A. Parmar, L. Boirin
- 120. [Exotorus around a Neutron Star with an Exoplanet: Smoke Ring](#)  
Tsubasa FUKUE (Kyoto University), Chizuru AKIZUKI, Jun FUKUE
- 121. [Relativistic Radiative Flow in a Luminous Disk](#)  
Jun Fukue and Chizuru Akizuki (Osaka Kyoiku University)
- 122. Absorption lines in the Dipping Sources Observed by Chandra  
R. Iaria (Univerita' di Palermo), G. Lavagetto, A. D'Ai', T. Di Salvo, N. R. Robba
- 123. [The 2002 outburst of the accretion-powered X-ray millisecond pulsar SAX J1808.4-3658](#)  
Askar Ibragimov (University of Oulu, Kazan State University), Juri Poutanen (University of Oulu)
- 124. Suzaku Observation of an anomalous X-ray pulsar CXO J164710.2-455216  
Nobuyuki Kawai (Tokyo Tech) on behalf of the Suzaku Operation and QL Team
